

# THIRD PARTY RISK MANAGEMENT

# HARNESS THE POWER OF VENDOR RISK EXPERTS

## YOU ARE ONLY AS SAFE AS YOUR VENDOR PARTNERS

Cybersecurity teams are tasked in defending against and keeping up with evolving cyber threats, making it almost impossible to fight this battle on their own. Not to mention, technology stacks are expanding and the use of third-party vendors are growing at a high rate, introducing more risk into the environment. But not knowing the level of risk to your organization from each of these business relationships can **bring unwelcome surprises to your doorstep.**

## SCALE YOUR VENDOR SECURITY WITH EXPERT GUIDANCE

SecurityScorecard's third-party risk management (TPRM) professional services team collaborates with clients who require help **keeping pace with the constantly evolving cyber security risk landscape and managing their third-party vendor population.** Many of these organizations are either in the early stages of designing or scaling existing TPRM processes, and often lack the necessary vendor risk experts to monitor, mitigate, and report cross-laterally between executive leadership and vendor partners.

### A Partnership That Delivers

Thanks to our years of vendor security experience, we can help you build a robust TPRM program that delivers the results your executives want.

**We're here to help you succeed, reduce vendor risk, realize ROI from security investments, streamline efficiencies, and be a sustainable business partner for years to come.**

## SECURITYSCORECARD SOLVES THESE TOP TPRM CHALLENGES

**01.**

Limited knowledge of TPRM best practices

**02.**

Misaligned people, processes, and technology

**03.**

Lack of a defined TPRM plan

**04.**

Knowledge gap and vendor security resources with limited experience

# SECURITYSCORECARD TPRM PROFESSIONAL SERVICES

Regardless of where your organization is on your TPRM journey, SecurityScorecard will customize a dynamic strategy to scale and meet your business needs.

## TPRM FUNDAMENTALS

Discover your TPRM maturity phase

SecurityScorecard's TPRM Fundamentals is a no-cost service that brings in subject matter experts to collaborate with your team to understand and outline your goals and objectives as it relates to your existing TPRM program.

## TPRM BLUEPRINT

Develop a TPRM roadmap for success

SecurityScorecard's TPRM Blueprint assess your existing TPRM program to provide a clearly-defined roadmap with actionable next steps to mature your organization's processes and procedures.

## TPRM OPERATIONAL ALIGNMENT

Assess and align people, processes, and technology

SecurityScorecard's TPRM Operational Alignment evaluates how to optimize your TPRM program to strategically re-align it to your people, processes and technology.

## TPRM VENDOR WORKFLOW MANAGEMENT

Respond and continuously manage third-party vendors

SecurityScorecard's TPRM Vendor Workflow Management assigns a vendor risk professional to work with you to identify critical vendors, risk, and process mitigation plans, through a TPRM questionnaire platform to quantify and measure enterprise-wide threats.

### END RESULTS:

Understand how SecurityScorecard can provide best practices and partner to drive and support your enterprise-wide strategic TPRM program initiatives.

Recognize how to scale your TPRM program through increased risk oversight and stronger third-party vendor relationships.

Remove redundancy and reduce hard and soft costs through consolidation and optimization.

Balance the burden and operational responsibility of monitoring and reporting third party risk.
