SecurityScorecard

Automate Your Cybersecurity Questionnaire Assessment & Validation Workflow

Is your third-party and vendor assessment process driving actionable business value?

Organizations share sensitive information with an average of 583 third parties. Yet, only 16% of organizations say they effectively mitigate third-party risk. Build an impactful third-party risk management program with SecurityScorecard Ratings and Questionnaires..
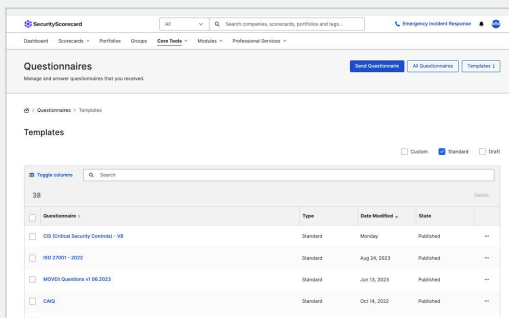

Use a standard questionnaire framework, edit an existing one, or create a custom questionnaire.
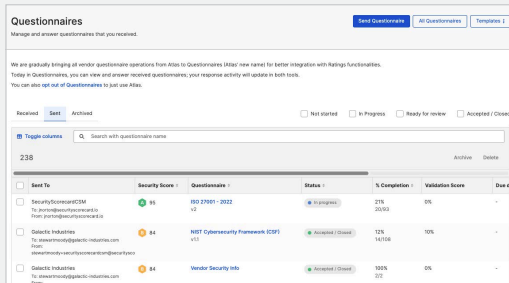

Track the status of every questionnaire you've sent and received in one dashboard.

*Organizations are increasing the number of parties they work with, enabling their internal teams to focus on core operations. However, working with third parties introduces new risks and an expanded attack surface, making companies more vulnerable to cyber threats. Working with more third parties requires even more due diligence questionnaires. Still, **82% of organizations** rely on spreadsheets and manual processes to manage their third parties and make key business decisions. Without the right processes in place, organizations will continue to make decisions blindly.*

The Modern, Turn-Key Solution for Automating Third-Party Assessments

SecurityScorecard Questionnaires is the leading cybersecurity questionnaire exchange and validation solution for modern risk management. SecurityScorecard accelerates the questionnaire exchange process by enabling you to manage, complete, and instantly validate cybersecurity questionnaires and evidence with ease. With vendor-provided responses instantly mapped to **SecurityScorecard Ratings,** SecurityScorecard gives you a truly objective 360° view of risk.

Streamline Your Questionnaire Process

#### Create and Store your Questionnaires in One Secure Platform

- Create a new questionnaire, upload a spreadsheet, or edit an existing one.

- Leverage 40+ industry-standard framework questionnaires – such as NIST, ISO, or PCI – and easily edit them right in SecurityScorecard Questionnaires.
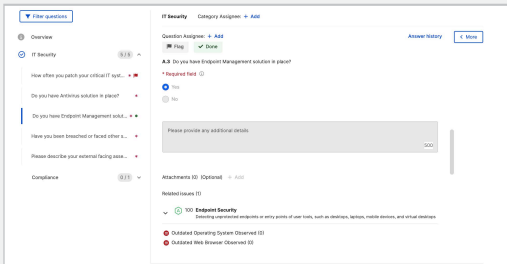

Securely Send or Schedule Questionnaires

- Send a questionnaire to one or multiple vendors at once or schedule the distribution of future questionnaires.

- Ensure the security of you and your vendors' data by moving out of email and into a secure platform.

Set Automatic Reminders and Track Real-Time Statuses

- Set due dates and reminders, so you don't have to follow up.

- Responders can leverage SecurityScorecard's machine learning to get automatic answer suggestions and respond faster.

- Manage all of your sent questionnaires and get real-time status updates in one dashboard.

- Ease collaboration by communicating with your third parties within each questionnaire.
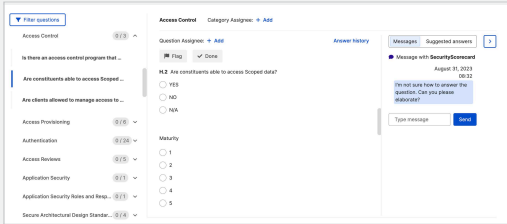

Streamline collaboration by messaging directly in a questionnaire.

Instant validation with SecurityScorecard Ratings mapped in Questionnaires.

> **Questionnaires has proven to be very useful in helping our organization move away from sending Word documents, relying on email, and a lot of back and forth that you get with the old questionnaire processes.**

Kenneth Ord, Head of Security & IT, Modulr Finance

About SecurityScorecard

SecurityScorecard helps security professionals work collaboratively to solve mission-critical, cybersecurity issues in a transparent way. The SecurityScorecard platform provides continuous, non-intrusive cyber risk monitoring of any organization and its ecosystem.

Validate and Collaborate to Review Completed Questionnaires

- Significantly reduce the time it takes you to review a questionnaire with **SecurityScorecard Ratings** issue-level data automatically mapped to individual questions. Trust but verify vendor-provided data and make more informed cyber risk decisions.

- Assign specific sections or questions to team members for review, collaborating to more quickly review and record findings.

Share Your Findings and Remediation Plan with Vendors

- Summarize all of your findings into one report that can automatically be saved as a PDF and shared with your vendors.

- Invite your vendors to SecurityScorecard, giving them free access to their Scorecard and enabling them to take control of their cybersecurity posture.

Why SecurityScorecard?

- *One platform.* The industry's only completely integrated security ratings and vendor assessment solution.

- *360° view of risk.* Ratings auto-mapped to individual responses for AI-powered instant validation of responses.

- *Cut the questionnaire cycle in half.* Gain back valuable time, allowing your team to be more strategic.

- *Automatic questionnaire completion.* SecurityScorecard's Smart Mapping Engine uses machine learning to instantly fill out newly received questionnaires, saving you hours.

- *API for easy integration.* Instantly integrate SecurityScorecard's cybersecurity data into your existing workflows.

- *Immediate time to value.* Start using Questionnaires right away, with no implementation time for you or your vendors.

- *Secure questionnaire exchange.* Ensure security and minimize risk by streamlining in SecurityScorecard.

- *Easy to use.* Easy to use for you and your vendors, accelerating the questionnaire process.

- *In depth insights.* Actionable insights about your vendors' cybersecurity posture and your questionnaire process.
