SecurityScorecard

ESG Data

Get critical data for evaluating Environmental, Social, and Corporate Governance (ESG) risk

Cyber Isn't the Only Emerging Trend in the Third-Party Risk Universe

According to Gartner, 75% of vendor risk management programs will be tracking the environmental, social and governance (ESG) demands of their IT vendors to guide decision making by 2024. Investors and regulators are focusing on ESG risks. TPRM programs will need to expand their ability to monitor for and report on ESG risks at scale.

Get an Expanded View of Risk
