

Make the Shift from Reactive to Proactive Cyber Risk Management

Cyber risk is dynamic and ever-evolving, yet traditional insurance strategies remain grounded in single-point-in-time assessments. Not keeping a constant eye on the health of a cyber portfolio can lead to unexpected or systemic claims.

SecurityScorecard continuously identifies cyber risk insights to help portfolio managers protect capital reserves for cyber. All you need is the portfolio organization's domain addresses to start leveraging the industry's most comprehensive and actionable cyber risk data.

Key Benefits

Lower Loss Ratios

Proactively mitigate exposure to risks not priced into premiums

Increase Renewals

Ensure policyholders remain compliant to renewal requirements even if unexpected risks arise

Increase Customer Satisfaction

Deliver an exceptional customer experience with timely and relevant communications

Why Choose SecurityScorecard?

TRUST

We have built **the most comprehensive data collection and attribution infrastructure**, giving customers relevant, actionable, and trusted cyber risk information.

+12M

continuously monitored companies across the world and every industry

97%

of data is collected and owned by SecurityScorecard

+100B

vulnerabilities and attributions published weekly

ACCURACY

We have **the most engaged and active community of security practitioners**, driven by a unique freemium model that incentivizes users to maintain an accurate view of their organization's security posture.

+37k

companies signed up to use SecurityScorecard

7-8

point score improvement for engaged organizations

+6M

feedback items from the community each year

Capabilities

Integrated Cyber Risk Data and Analytics Platform

Maintain Portfolio Diversity

Identify and quantify sources of systemic risk driven by common vendors, technologies, and security issues

Zero-day Vulnerability Response

Quickly identify which policyholders are exposed to newly discovered issues and drive remediation by creating awareness

Drive Renewal Readiness

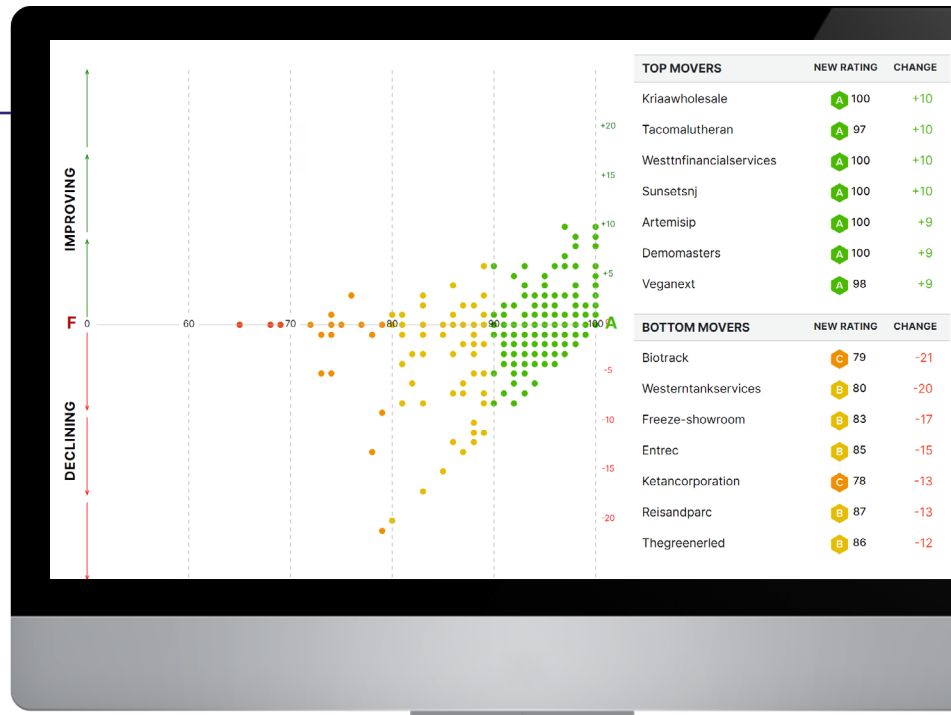

Create sufficient time for policyholders to prepare for renewal by immediately alerting them of issues that

Increase Policyholder Engagement

Communicate directly with brokers or insureds via the same platform they use to monitor their security performance

Report Risk Management Performance

Visualize trends in the aggregate security posture of a portfolio to inform risk management strategies

3rd Party	Security Score	30 Day	Products Used	Portfolio Connections
