

# See **High-Level Scores** of the Companies Important to You with Watch List

## Scale Your Third-Party Risk Management Monitoring

Easily monitor the high-level scores of companies you care about without having to spend the money on a detailed view. With the Watch List, companies can add any scorecards to a list to continuously monitor scores only and still have the flexibility to add those companies to a portfolio for a more detailed look at potential issues and remediation should the need arise.

Continuously track, monitor, and tag high-level scorecard scores of organizations who are not a part of a portfolio

Monitor companies who are still important enough to keep track of without having to pay the full price for insights

Easily add a company from your Watch List to a Portfolio for further monitoring, investigation, and remediation

## When Should I Use Watch List?

Watch List is bundled with Portfolios and is purpose built for customers who still want to monitor companies that may not be critical but still want to keep an eye on. Perfect for organizations who may not have the budget for a full scorecard view, Watch List is also great for organizations who want to uplevel or mature their TPRM program, but don't know where to start. Watch List provides the visibility you need to help you assess risk.
