

# Automate and scale your third-party risk management with SecurityScorecard and OneTrust

## Key Benefits

01

**Get Started Quickly** - Deploy in minutes from the OneTrust Integrations Gallery, or view the top-level score on thousands of vendors for free in the Third-Party Risk Exchange.

02

**Scale GRC and TPRM Programs** - Continuously monitor thousands of vendors in one platform and access top-level, factor-level, and issue-level SecurityScorecard cyber ratings and data in OneTrust.

03

**Create Automatic Alerts and Follow-Ups** - Get automatically alerted to changes in security posture and automate actions, such as vendor assessments, based on score changes.

04

**Make Informed Decisions with Stakeholder Reporting** - Leverage OneTrust's reporting capabilities to communicate third-party risk combined with SecurityScorecard's easy to understand A-F grades, providing a more comprehensive view of your threat landscape.

## Overview

The increase in third-party-related security events has been felt acutely by organizations across the globe. Each third-party creates additional vulnerabilities by expanding the number of entry points into an organization. According to a recent [survey of security practitioners](#), virtually all (91%) of respondents reported their organization has experienced an IT security incident related to a third-party partner in the past year.

Most organizations do not have enough human resources to effectively manage third-party risks to their network. Roughly 20% of healthcare or government organizations reported having over 500 third-party relationships. The sheer number of third parties an organization works with combined with limited resources emphasize the need to automate third-party risk management.

OneTrust's Third-Party Risk Management application automates workflows to streamline the third party, vendor, or supplier lifecycle from onboarding to risk mitigation and offboarding.

OneTrust TPRM provides a central vendor inventory to track relevant information on all your third parties, automate vendor risk assessment workflows, implement any control risk framework, and monitor and track performance and compliance with powerful analytics dashboards and reports.

SecurityScorecard Ratings enables companies to continuously monitor, analyze, and report cyber risk across 10 risk factor groups in an easy-to-understand A-F grade. SecurityScorecard uses non-intrusive and proprietary data collection methods, to quantitatively evaluate the cybersecurity posture of any organization to drive scalable and automated third-party risk management.

SecurityScorecard cybersecurity ratings 'out-of-the box' integration with OneTrust's Third-Party Risk Management application provides instant and real-time visibility into the detailed security posture of your supply chain and third party vendors. Together OneTrust and SecurityScorecard can help transform your business, not just your vendor risk management program, with trusted third-party risk management.

## Using SecurityScorecard and OneTrust Together

ID	Name	SecurityScorecard Grade	SecurityScorecard Score	SecurityScorecard Industry	SecurityScorecard Domain	Orga
7	Amazon.com, Inc.	C	79	technology	amazon.com	SecurityScor
5	GitHub, Inc.	D	67	technology	github.com/	SecurityScor
9	Intel	A	96	technology	intel.com	SecurityScor
10	Iron Mountain	B	87	technology	ironmountain.com	SecurityScor
15	LinkedIn Corporation	B	85	information_services	linkedin.com	SecurityScor

16	Zendesk, Inc	B	87	technology	zendesk.com	SecurityScor

View a vendor's overall security score in your vendor list on the Third Parties page

## Highlights

### 100s

OneTrust supports 100s of Laws, Standards, and Frameworks

### Data

SecurityScorecard data is gathered via non-intrusive collection techniques, and new data sources are continuously added

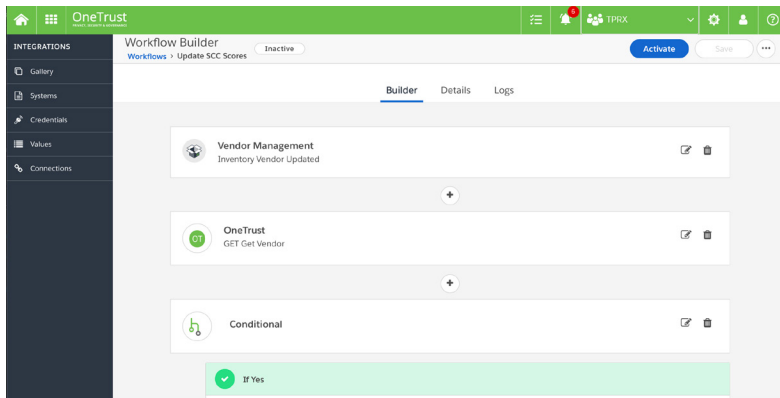

### 12+ million

companies continuously rated by SecurityScorecard

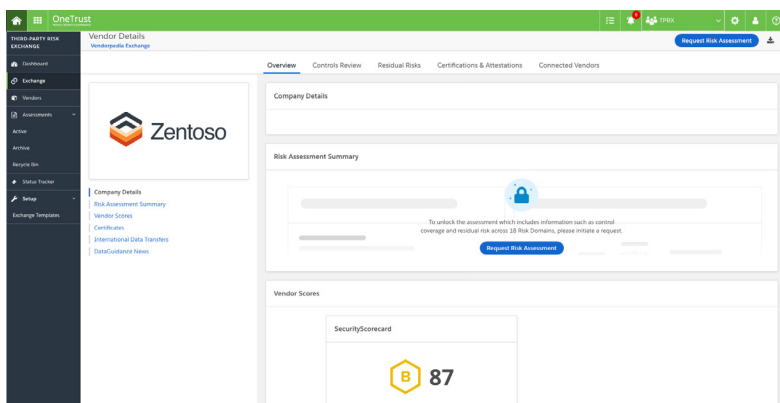

### 1000s

View 1000s of SecurityScorecard cyber risk scores out of the box in the OneTrust Third-Party Risk Exchange

*Use the workflow builder to schedule the frequency of updates from SecurityScorecard for your third-parties. Conditional logic allows you to automatically create actions when a third-party's score reaches a certain threshold.*

*See a Vendors' Top Level Score in OneTrust Third-Party Risk Exchange*

## Getting Started

The Top Level SecurityScorecard data is also available out of the box to OneTrust customers using the Third-Party Risk Exchange. Additionally, OneTrust customers gain complimentary access to a [SecurityScorecard Enterprise License](#) that enables you to monitor your own organization as well as up to 5 vendors, suppliers, or competitors. Customers using both OneTrust TPRM and SecurityScorecard can take full advantage of the integration by adding SecurityScorecard data to the vendor inventory or by configuring automation workflows that trigger actions when scores change.

## About OneTrust

OneTrust is the category-defining enterprise platform to operationalize trust. More than 12,000 customers, including half of the Fortune Global 500, use OneTrust to make trust a competitive differentiator, implementing central agile workflows across privacy and data governance, GRC and security, ethics and compliance, and ESG and sustainability programs. The OneTrust platform is backed by 200 patents and powered by the OneTrust Athena™ AI and robotic automation engine.
