

# Instantly Rate and Understand the Cyber Security Risk of Any Vendor in Your Portfolio

## Key Benefits

01

### Automate

*When a vendor's SecurityScorecard score falls below the minimum threshold set by the ServiceNow user, the system automatically creates and sends ServiceNow assessments for the vendor to complete.*

02

### Prioritize

*Use SecurityScorecard ratings to determine which vendors to prioritize for deeper reviews based on their cybersecurity risk posture.*

03

### Assess

*Continuously monitor vendor cybersecurity by viewing SecurityScorecard ratings (A-F,0-100) for every vendor in a ServiceNow user's third-party ecosystem.*

04

### Invite

*Ask vendors to join SecurityScorecard for free, so they can improve scores by acting on issue-level remediation guidance.*

## Overview

Just as you continuously monitor cyber risks in your organization, you must do so for your vendors. Accurate tiering, continuous monitoring, and proper assessment of your vendors reduce your risk of a breach and/or noncompliance. Automating these processes improves productivity and speeds up remediation to better protect the business.

Through the integration with ServiceNow Vendor Risk Management, SecurityScorecard vendor security risk ratings are automatically updated within ServiceNow, reflecting the evolving cybersecurity posture of business partners in your third-party ecosystem. This information allows you to fine-tune the tiers assigned to your vendors through internal assessments and more accurately reflect the true risk posed by specific vendors. The vendor tier is an important element to consider when assigning the type and frequency of vendor risk assessments. As vendor tiers change, automated workflows can push vendor invites and mandated vendor risk assessments.

## Highlights

### Superior Service

After working with other vendors, customers point to SecurityScorecard's customer service as the number one reason for moving to the platform.

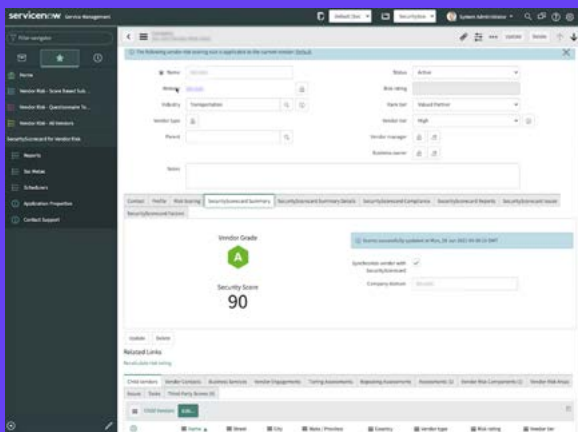

### The Best Data Available

Security ratings are only as good as the data and attribution that support them. SecurityScorecard data is gathered via nonintrusive collection techniques, and we're continuously adding new data sources.

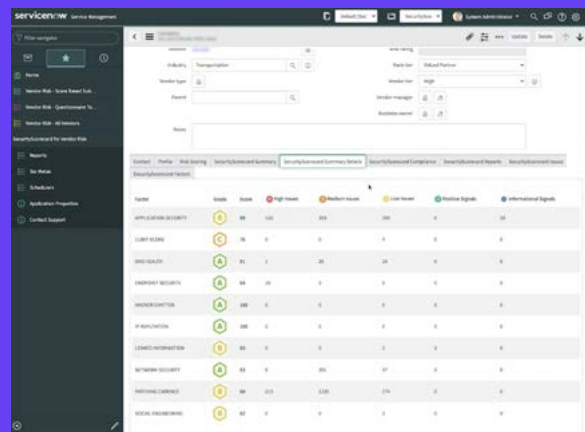

## Getting Started

Existing SecurityScorecard subscribers can access the integration for free, and new customers can sign up for a [free trial](#) to experience the benefits of SecurityScorecard. The SecurityScorecard application is available in the [ServiceNow Store](#).

## Using SecurityScorecard and ServiceNow Together

The SecurityScorecard Summary tab contains a top-level score and grade for the vendor that is automatically populated from the SecurityScorecard portfolio.

In the SecurityScorecard Summary Details tab, issues are broken down into ten risk factors that are ranked and scored by severity.

## About ServiceNow

ServiceNow (NYSE: NOW) is making the world of work, work better for people. Our cloud-based platform and solutions deliver digital workflows that create great experiences and unlock productivity for employees and the enterprise.
