DATA SHEET

AI Agents at SecurityScorecard: From Passive Data to Active Defense

Welcome to the agentic-native future. As a SecurityScorecard customer, you already have access to world class, extensive, in-house risk data. AI Agents are designed to take the next step: analyzing that entire portfolio in minutes to transform complex data into immediate, actionable plans. We help your team scale, while leaving you and your team in the decision seat.

By leveraging AI to scan your vendor ecosystem for score drops, Known Exploited Vulnerabilities (KEVs), and breaches, our agents do the tedious, time consuming work so your team has time for higher leverage work. They draft remediation plans and vendor-facing emails in clear language that your stakeholders and vendors understand.

Agent Highlights: Your New 24/7 Risk Team

The SecurityScorecard AI Agent suite provides comprehensive automated coverage across the entire vendor risk management lifecycle.

Data, Reporting & Workflow Agents

Reporting Agent
Seamlessly build executive-level reports that clearly demonstrate changes in scores, unresolved issues, and risk exposure across your portfolio for key stakeholders.

Rule Builder & Monitoring Setup Agents
Empower your team to effortlessly build new alert rules using simple natural language and set up comprehensive monitoring across your entire portfolio with basic commands.

Remediation Planning Agents

Remediation Agents (KEV, Score Drop, Breach, Critical Vulnerability)
These powerful agents save your team hours by scanning your entire vendor portfolio in minutes to identify critical issues. They instantly draft customized remediation plans and vendor-facing emails to speed up response times.

Breach, Malware, Ransomware Analyst Agent
Scans an entire portfolio in minutes to find critical security events, including breaches, ransomware, and malware infections across your ecosystem.

Questionnaire Gap Analysis Agent
Analyze your vendors' responses to questionnaires quickly to find deviations (gaps) by comparing a vendor's submitted questionnaire answers against our risk data sources on that company.

Specialized Security Analysis Agents

Downstream Breach Analyst Agent
Gain immediate visibility into complex 4th-party risk. See exactly which of your vendor's vendors have experienced breaches in the last year.

AI-generated outputs should be reviewed by qualified personnel before implementation and do not constitute professional advice. All AI actions require human approval. Use of AI Features is subject to our Terms of Service and Artificial Intelligence Addendum.

SECURITYSCORECARD AT A GLANCE

One platform:
Relevant, full-context data for continuous identification, cataloging, and management of all your digital assets and vulnerabilities.

The world's most trusted security ratings:
Pinpoint potential risks across your digital ecosystem.

Actionable recommendations
Prioritize critical risk and quickly mitigate threats. Move beyond static alerts and leverage AI and automation to identify risk and fortify for the future.
