

Products and Services

Delivering a modern, threat-informed approach to TPRM

SecurityScorecard uses artificial intelligence and threat intelligence to continuously manage, detect, and respond to global supply chain risk. Our products and services deliver the full spectrum of modern TPRM outcomes while strengthening resilience. Reduce compliance burden and administrative friction, drive measurable risk reduction, and prioritize the most critical exposures with TITAN AI.

Products

TITAN Watch

Gain real-time visibility into your third-party ecosystem, uncover unseen vendors, shadow IT, and eliminate blind spots to understand and continuously monitor your extended supply chain risk.

Core

For organizations with programs based on point-in-time assessments who operate within industry standard frameworks.

Key features include:

- Security rating scorecard
- ChatSSC
- Pre-built template questionnaires
- Vendor system of record
- Rules and alerting
- Basic reporting

Premium

For organizations with risk management programs that adopt continuous monitoring and implement integrated workflows.

Includes everything in Core, plus:

- Automated vendor discovery
- Unlimited high-level ecosystem monitoring
- AI agents
- Pre-built workflow integrations

Elite

For organizations with threat-informed risk management programs or who require data access through APIs.

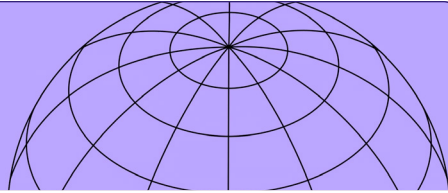

Includes everything in Premium, plus:

- Co-branded and white-labeled scorecard exports
- Custom compliance mapping
- Unlimited API access

Cyber Risk Quantification

Translate security issues into financial exposure to justify the value of security investments and communicate risk in business terms.

TITAN Assess

Transform the security assessment lifecycle from a manual, point-in-time hurdle into a continuous, AI-accelerated workflow. Built for both security teams and revenue-driven organizations, TITAN Assess accelerates sales cycles and builds faster trust between buyers and suppliers.

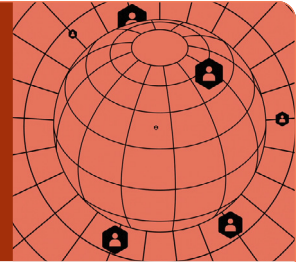

Trust Pages

Proactively share verified security information with prospects to deflect up to 75% of incoming questionnaires.

Questionnaire Response Automation

Automatically complete security questionnaires in any format (Excel, Word, PDF, or web portals) with 91%+ verified accuracy.

TITAN Secure

Unify continuous monitoring and real-time breach intelligence to identify, prioritize, and act on cyber risks across their vendor ecosystem. TITAN Secure enables threat-informed TPRM with collaborative workflows that enable containment of supply chain risks in real time.

Services

TITAN MAX Managed Services

Achieve your TPRM outcomes without having to deploy additional in-house resources. MAX identifies high-risk vendors, continuously monitors active threats, and drives vendor remediation to strengthen third-party cyber resilience.

MAX Questionnaires

Reduce questionnaire cycle times by up to 26x with an end-to-end service. MAX Questionnaires handles questionnaire creation, distribution, and analysis so that programs can meet their security and compliance requirements.

MAX Monitor

Achieve 100% vendors under management with a managed service for threat-informed continuous monitoring of third-party risks. MAX Monitor Identifies insights for in-house teams to respond to supply chain risk changes.

MAX Respond

Increase critical vendor security issue remediation by 2x with threat-informed continuous monitoring and vendor engagement. MAX Respond proactively and reactively reaches out to vendors to drive risk awareness and issue resolution.

Proactive Security Services

Defend your organization with a range of services that battle test your security controls to eliminate risk, including penetration testing, red team simulations, and table top exercises.

Onboarding

Accelerate your SecurityScorecard return on investment with structured onboarding services designed for optimizing adoption of SecurityScorecard Platform capabilities.
