

TITAN Assess

AI-Powered Security Questionnaire Automation & Compliance

PRODUCT OVERVIEW

Transform your security assessment lifecycle from a manual, point-in-time hurdle into a continuous, AI-accelerated workflow. By combining proprietary RespondAI technology with expert human verification, TITAN Assess automates the manual workload associated with security questionnaires and compliance documentation. TITAN Assess eliminates the visibility gap by bringing together self-reported vendor data and objective security ratings, ensuring total reliability with human verified accuracy.

Built for both security teams and revenue-driven organizations, TITAN Assess **reduces manual effort by up to 92%**, allowing teams to complete complex reviews in minutes rather than weeks. This modernization enables organizations to scale their third-party risk programs without increasing headcount, accelerating sales cycles and building faster trust between buyers and suppliers.

Key Features

Intelligent Response Automation (RespondAI)

- **Precision AI Responses:** Automatically complete security questionnaires in any format (Excel, Word, PDF, or web portals) with 91%+ verified accuracy
- **Centralized Knowledge Base:** RespondAI intelligently drafts answers by pulling from a unified source of truth containing previous responses, policy documents, and live compliance evidence
- **Expert Human-in-the-Loop Verification:** Every AI-generated response is reviewed by certified experts to ensure total reliability and accuracy before delivery.

Proactive Trust Building & Evidence Sharing

- **Customizable Trust Pages:** Proactively share verified security information with prospects to deflect up to 75% of incoming questionnaires
- **Secure Data Rooms:** Centralize sensitive documents like SOC 2 reports and contracts in controlled environments featuring NDA gating, watermarking, and comprehensive audit trails
- **Dynamic Access Controls:** Maintain granular control over sensitive documentation with automated access expiration and permission management

Unified Sales and Compliance Ecosystem

- **Salesforce Native Integration:** Eliminate sales cycle bottlenecks by submitting and tracking questionnaire progress directly within Salesforce
- **Continuous Compliance Syncing:** Automatically ingest and update security controls from platforms like Drata, Vanta, and Hyperproof to keep your response knowledge base current in real-time
- **Collaboration Workflows:** Accelerate review cycles with native, real-time integrations for Slack and Microsoft Teams

Benefits

Benefit	Impact
Speed	Process questionnaires up to 18X faster, reducing turnaround from weeks to as little as 45 minutes.
Revenue Growth	Accelerate sales cycles and reduce time-to-close by up to 2 weeks by removing security review friction.
Operational Efficiency	Complete hundreds of additional annual questionnaires without increasing headcount.
Accuracy & Trust	Maintain a single, AI-updated source of truth for all security details with 91%+ verified accuracy.

Ideal For

- **GRC Teams:** Leaders who need to eliminate the manual grind of spreadsheet-driven reviews and solve the questionnaire gap without increasing headcount
- **Security and Compliance Teams:** Practitioners looking to automate up to 95% of the assessment workload and maintain a living, verified source of truth for security controls
- **Sales and Revenue Operations:** Teams focused on accelerating sales cycles by up to two weeks by removing security friction and deflecting up to 75% of incoming requests
- **Procurement and Legal:** Stakeholders aiming to streamline vendor onboarding and securely manage sensitive documentation through controlled, auditable data rooms

Technical Specifications

Core Capabilities

- **Intelligence Engine:** Powered by RespondAI for automated document analysis and drafting
- **Verification Model:** Integrated Human-in-the-Loop expert review workflow
- **Deployment:** Secure, cloud-based SaaS; integrated within the TITAN AI platform

Compatibility and Formats

- **Supported File Types:** Native support for Excel (.xlsx), Word (.docx), and PDF formats
- **Intake Methods:** Direct web portal imports and browser-based questionnaire capturing

Ecosystem Integrations

- **CRM and Productivity:** Native integrations for Salesforce, Slack, and Microsoft Teams
- **Compliance Syncing:** Live API connectors for Drata, Vanta, and Hyperproof
- **Identity & Access:** Support for Google SSO and custom SAML 2.0 configurations

Compliance Frameworks

- **Global Standards:** Compliance support for GDPR, SOC 2, DORA, NIS2, and ISO standards
- **Custom Frameworks:** Flexible architecture to support proprietary internal process requirements

“When we’d receive 300-question questionnaires, it would be an entire day of work. HyperComply helps us process questionnaires 71% faster. It’s a huge time-saver and weight off my shoulders.”
